ROSES

Our Roses this Spring, as they were this past year, will be potted in "Plantpots". This is a papier mache' pot in an attractive tan color. With this pot there is no necessity for removing the pot when planting. Experimental work has shown that it will decompose in the soil in a period of 30 to 45 days.

Potted Roses will be well leafed out by May 1st to May 10th. If you want this stock early and in full leaf, please notify us in early March and we will schedule to have your Roses in foliage by April 15th.

A VIEW OF OUR NURSERY BUILDINGS showing Office, Storage Sheds, Propagation Greenhouses, Lath House, Housing facilities for our Nursery labor.

Note in the fore-ground the use of terraces and Green manure crops. All land is rested at least three years between nursery crops.

In addition to Evergreens, we are now growing a fairly complete line of Shade Trees and Flowering Shrubs. All of this stock is heavily branched and bushy, and we are sure our customers will find it most satisfactory.
